## Chip Location Information

For cycling and mountain biking events:

The specially designed clip must be used to attach the ChampionChip to the frame (**central tube**) of the bike or to the front fork via the **quick release of the wheel**. **The chip must be located below Knee height to ensure a read is taken.**

If unable you are unable to use the quick release option then please ask for an ankle strap. It is YOUR responsibility to ensure that the chip is used in the appropriate manner. Remember no chip NO time.
